**KZONE COOL - Keeps You Cool**  
KZONE rapid evaporation technology employs 100% Polyzone™ microfiber construction to keep athletes cool, dry and comfortable when the heat is on. KZONE performance wear and accessories are soft, lightweight and incredibly durable.

**KZONE WARM - Keeps You Warm**  
KZONE technology fine-tunes muscle temperature while enabling rapid evaporation of skin moisture, keeping you dry and warm when temperatures drop. KZONE performance wear features an exterior poly microfiber shell and thin, lightweight interior poly fleece.

**O-ZONE - Antimicrobial Shield**  
O-ZONE is powered by patented Agion® technology and defends against insole odor. Unlike other antimicrobials, Agion® is natural and non-toxic, employing silver ions to attack and inhibit the growth of odor causing microbes.

**ROTOGRIP - Proprietary Outsole**  
3N2's ROTOGRIP outsole is created from a revolutionary dual-injection process, employing a rugged compound to protect cleat tips from premature wear, and a more supple base material for maximum flex and support. Its 12-cleat configuration features a rotary heel for sure footing on any surface, quick cutting and instant acceleration. Added durability comes courtesy of a subtly raised TPU toe bumper.

**PROPIVOT - Cleat Configuration**  
Developed in conjunction with 3N2 athletes, the proprietary PROPIVOT cleat configuration features a center-flex tread pattern specifically designed to maximize speed, traction and batting power.

**METAMESH - Mesh Technology**  
METAMESH is an advanced synthetic mesh that maintains the lightweight flexibility and breathability of conventional mesh while providing unprecedented abrasion-resistance and durability ratings that are off the charts.

**FUEGO-8 - Proprietary Outsole**  
FUEGO-8 is our premiere-pro, 8-spike cleat configuration custom designed from next-gen materials to meet the unique performance demands of professional athletes. Features a flame-patterned, dual-color TPU outsole.

**FLEXCORE - Insole Technology**  
The FLEXCORE form-fitting insole achieves a snug, ergonomic fit through its unique spiral, flex-groove design. A foam core provides optimum shock absorption, while an integrated forefoot flex-plate provides maximum impact resistance against cleat pressure. Lined with O-ZONE antimicrobial shield.

**JACKRABBIT - Proprietary Midsole**  
The JACKRABBIT EVA heel spring system provides cushioned comfort and rapid response performance to power athletes through even the toughest training regimen.

# 3N2 TECHNOLOGY

**BOUNCEBACK - Midsole Technology**  
The advanced design of the sleek BOUNCEBACK midsole system utilizes an integrated air-bubble to provide unbelievably responsive cushioning, spring and impact absorption. The bubble is suspended midheel to best counter and soften downward force.

**LEVIT 8 - Proprietary Midsole**  
The lighter-than-air, injection-molded LEVIT 8 is one of the lightest midsoles 3N2 has ever produced. Although more expensive than traditional EVA, injection molding results in a higher-quality, lighter and more durable midsole with less environmental waste.

**REVV - Proprietary Outsole**  
Bust out of the batters box in the REVV, our advanced grip, speed-enhancing outsole with a dual-form tread pattern for easy pivoting and powering around the bases. Its 3N2 custom-designed TPU shank provides arch support and flexibility.

**FLASHPOINT - Flame-Laminated Construction**  
A revolutionary process that eliminates the need for toxic glues in footwear manufacturing. Using FLASHPOINT, 3N2 shoe components are affixed to one another through flame lamination, resulting in a lighter, more durable shoe that is also environmentally and worker friendly.

**ELEV8 - Proprietary Midsole**  
The feather-light ELEV8 is a 3N2 classic — the compression-molded, pro-caliber midsole featured on the entire line of 3N2 professional spikes. Heralded for its durability, cushion and spring, the ELEV8 is a true performance booster.

**NITRO-9 - Proprietary Outsole**  
The NITRO-9 molded outsole features an aggressive, TPU nine-cleat configuration inset into a highly flexible, wave-patterned plate. Enables explosive starts, dead stops and breakneck base running.

**SOFTSHIELD - Proprietary Apparel**  
SOFTSHIELD is an outer protective apparel covering made from a proprietary material blend that is both extremely water resistant, supple and soft to the touch. Currently featured in 3N2's line of RBI Fleece apparel.

**PT - Pitching Toe**  
Protect your cleats from premature wear with the insanely tough PT PITCHING TOE. The PT is designed and engineered for highly fluid toe drag and is made from a revolutionary rubber compound that is lighter and more durable than traditional pitching toes.

**POGO - Proprietary Midsole**  
The 3N2 POGO is an advanced, injection-molded Phylon midsole designed to minimize both underfoot cleat pressure and athlete response time. The injection process makes POGO one of lightest weight midsoles on the market with one of the longest lasting cushions. Injection molding is also environmentally friendly, greatly reducing the amount of waste associated with conventional molding.

**IGNITE - Proprietary Outsole**  
Light up the diamond with IGNITE - our classic, rugged turf outsole boasting a single-form tread pattern that provides the uniform support and rotational traction needed to confidently power around bases.

**GLIDE - Proprietary Midsole**  
Keep a spring in your step game-after-game with the GLIDE - our lightweight, compression-molded EVA midsole specifically designed to relieve pressure on the knees and back, providing unparalleled comfort and performance.
