Waist	22-23	23-25	24-26	26-28	28-30

## SIZING TIPS

Our numeric sized products are designed to fit specific measurements. All of our size charts reference body measurements.

## HOW TO TAKE BODY MEASUREMENTS

If a cloth measuring tape is not available, use a string and then measure the length against a yard stick. If possible, have someone else take the measurement.

**Chest/Bust** – With your arms relaxed at your side, measure the circumference of your chest. Hold the end of the tape at the fullest part of your bust, go under your armpits, around your shoulder blades and back to the front of your chest. Keep the tape level and taut, but not stretched.

**Waist** – Standing straight up and measure your waist at your “natural waistline” which is located above your belly button. Hold the end of the tape at the front of your body and circle around the back to measure the circumference of your waist. No cheating – don't suck in your stomach.

**Hip** – Start the tape at one hip and circle the tape around the largest part of your backside and over your other hip until you are back where you started. Keep the tape level and taut, but not stretched.

# SUBLIMATION COLORS

3N2 has developed our sublimation color swatches based on the most popular colors used by sports teams around the world. Our art team has done extensive research to ensure that the selected Pantone colors match up with the most common shades of each color. The use of fades or special effects, such as glowing edges or shadows, will alter the appearance of these colors. In addition, colors may vary slightly when printed on different fabrics.

3N2 cannot accept returns for product based on final color output, unless there is proven to be a significant variation between the color selected and that which is printed on the final garment. If you feel that an improper color was used in the printing of your garment, please contact your dealer or sales rep and 3N2 will perform a thorough investigation to determine the nature of the issue.

The colors and Pantone colors shown above reflect the published Pantone colors closest to our exclusive 3N2 colors. These numbers and swatches should be used as a reference point only, as the 3N2 colors used for printing may vary slightly. Please contact your local dealer or sales rep with any questions prior to signing off on artwork.
